Keeping Up With Trends In Home Efficiency

Keeping up with seasonal trends in home comfort is often a time- and money-consuming challenge. There are a few trends that are here to stay, however, and some of those options can also help reduce your energy bills year after year.The company that brings you Tempstar brand heating and cooling products has the following suggestions to help you save money now and for years to come.* Heating and cooling: Today's air conditioners and heat pumps can be up to 40 percent more energy efficient than older, less efficient units. The money homeowners can save in reduced energy bills by purchasing a new, high-efficiency system is often worth the investment. The Tempstar SmartComfort 2400 high-efficiency air conditioner operates at 14 SEER efficiency to help you save money while you keep your home comfortable. * Electronic air cleaners: A good air cleaner can help trap many of the pollutants that may be traveling through the home. As part of the heating and cooling system, the new line of Tempstar electronic air cleaners filters indoor air to help improve indoor air quality. To ensure years of service, Tempstar indoor air quality products are backed by a five-year parts limited warranty. * Humidifiers: Moisture levels in the home can affect your family's comfort and the quality of your wood furniture and flooring. Humidifiers add moisture to the dry air in your home, which helps your body stay hydrated and comfortable. They can also help protect wood furniture and floors by maintaining the right levels of indoor humidity to prevent damage caused by dry indoor air. For information about Tempstar humidifiers, contact your local Tempstar installer. * Programmable thermostats: A programmable thermostat can help you reduce your energy bill by cooling your **K&K residential air duct cleaning** home only when you need it. With a programmable thermostat, your cooling system can work at a more cost-efficient temperature while you're away from home and lower the temperature to cool your home just before you return. To find a heating and cooling contractor near you, go to www.tempstar.com and click on the Dealer Locator button.Evaluate your home today to find out if you can make some money-saving improvements that could be worth their cost in energy savings and improved comfort. Chances are, you can. – NU
