In this format, players position a wager before a round begins. When the round begins, a visual graphic takes off-- in this case, the intrepid angler speeding across the water in his boat. As the boat takes a trip even more, an on-screen multiplier climbs higher and greater, starting at 1.00 x and theoretically climbing up to infinity (though capped at an optimum win limitation).

The goal is easy: **money out before the boat crashes.**

If a gamer cashes out effectively, their bet is increased by the present cash-out worth. If the boat crashes before they hit the button, the bet is lost. It is a game of high tension, split-second decisions, and balancing greed versus caution.
