The mechanics are simple yet thrilling:

1. **The Setup:** Players join or create a lobby and pick a particular batch of cases to open.
2. **The Buy-In:** Each participant pays the market worth of the chosen cases from their website balance.
3. **The Reveal:** The cases open round-by-round. Every drop is assigned a financial worth based upon Steam Community Market or third-party rates.
4. **The Winner:** At the end of the battle, the overall worth of all skins dropped for each player is tallied. The gamer with the highest total skin value takes home **all** the products dropped in the battle.

Typical Case Battle Game Modes

Third-party sites have innovated far beyond the basic 1v1 format. Today, gamers can select from a range of interesting battle variations:

- **Classic (Free-for-All):** The basic mode where 2 to 4 gamers compete independently. The greatest overall worth takes whatever.
- **Group Battles (2v2):** Players collaborate. The combined worth of Team A is compared versus Team B. If Team A wins, the swimming pool of items is split uniformly (or according to contribution) in between the 2 colleagues.
- **Terminal/Sudden Death Battles:** In this mode, the gamer who unpacks the *most affordable* value product in a round is gotten rid of, including a layer of thriller to every single case.
- **Crazy/Reverse Battles:** An amusing twist where the player with the *least expensive* overall value at the end wins the whole pot. This turns low-tier drops like £ 0.03 typical weapon skins into jackpot-winning products.
