What is the Plinko Gambling Game?

At its core, Plinko is a game of pure likelihood. The design is easy: a vertical board formed like a pyramid filled with equally spaced pegs. At the top of the board is a drop zone. Gamers launch a disc, ball, or puck into this zone, gravity takes over, and the item bounces randomly left and right as it cascades downward.

At the bottom of the pyramid sit a series of collection slots, each assigned a specific multiplier worth. Where the disc lands determines the payout. If it hits the center slots, gamers normally win a fraction of their bet or break even. If luck presses the disc toward the far outer edges, the multipliers increase, offering huge payments.
