In standard sports, wagering is typically restricted to match winners or point spreads. In CS2, the intricacy of the video game enables a broad range of "prop" bets and situational wagers. These markets are developed to show the subtleties of tactical first-person shooters.

1. Match Winner (Moneyline)

The most uncomplicated bet in the game. One wagers on which group will win the best-of-one, best-of-three, or best-of-five series. It is the standard for all wagering techniques.

2. Map Handicap

Due to the fact that many CS2 matches are played as best-of-threes, handicaps prevail. If a group is a heavy favorite, they might be provided a -1.5 map handicap. This indicates they must win the series 2-0 to cover the spread. Alternatively, banking on the underdog with a +1.5 handicap means they win the bet if they win even a single map in the series.

3. Overall Maps Over/Under

This market concentrates on the length of the series. In a best-of-three, the "Total Maps" is normally set at 2.5. Betting "Over" means the bettor anticipates the series to go to 3 maps; betting "Under" suggests a speedy 2-0 sweep.
