Feature Standard Online Casino Games Provably Fair Crash Games **Openness** Black-box RNG audited by 3rd parties. Cryptographically verifiable by means of hashes and seeds. **House Edge** Generally repaired (differs widely by game). Normally transparent and low (typically between 1% and 3%). **Verification** Count on regulatory trust. Gamers can check results using public tools.

Before a round begins, the server generates a surprise crash point and provides gamers with a cryptographic hash of that outcome.
