The Contribution Rate

Whenever a participant positions a qualifying stake or action, a little portion (referred to as the contribution rate) is siphoned away from the base return and added to the jackpot meter. This ensures that the reward swimming pool is continuously growing, developing a visual incentive for observers and participants alike.

Random Number Generation (RNG) and Fairness

In digital and regulated environments, fairness is critical. The trigger for the Towers Jackpot is normally governed by a certified Random Number Generator (RNG). This means that every individual has an equivalent statistical possibility of setting off the prize on any provided certifying round, regardless of the length of time the prize has actually gone without being won or how big the pool has actually grown.

Jackpot Tier Common Contribution Share Reset Value Win Frequency **Mini** High (frequent play pool) Low Very High (Daily/Hourly) **Minor** Moderate Medium Moderate (Weekly) **Major** Low High Low (Monthly) **Grand** Fractional Premium Unusual (Quarterly/Yearly)
