How CS: GO Case Battle Sites Work

1. **Account Creation**-- Users sign up, usually by connecting a Steam account. Some sites require e-mail verification or two-factor authentication.
2. **Deposits**-- Players load funds by means of payment techniques such as credit cards, PayPal, crypto-currencies, or skin-to-cash services. The transferred amount is transformed into platform credits ("coins").
3. **Picking a Case Battle**-- A lobby is produced where each participant chooses a case (e.g., "Gamma Case", "Revolver Case"). The number of rounds and the quantity of each round's bet are set in advance.
4. **Opening Process**-- The website runs an automated script that opens the chosen cases one by one. The outcome (which skin appears) is identified by a random number generator (RNG).
5. **Outcome Distribution**-- At the end of the battle, the overall worth of the skins each gamer gotten is tallied. The player whose skins sum to the highest value wins the pot.
6. **Withdrawals**-- Winners can withdraw their revenues either as skins (which can be transferred to their Steam stock) or as real-world currency, depending on the site's policies.
