Methods for Big Bass Crash

1. The Conservative Auto-Cashout Strategy

- **How it works:** Set your auto-cashout to a low, regular multiplier, such as 1.30 x to 1.50 x.
- **The Goal:** Accumulate small, constant wins over time. While an unexpected 1.00 x crash will still erase the bet, the frequency of striking 1.4 x is statistically high.

2. The Split-Bet Strategy (Using Dual Betting)

- **How it works:** Place one big bet with an auto-cashout set very low (e.g., 1.20 x) to cover your initial stake, and position a second, smaller bet that you manual-cashout for greater multipliers (e.g., 5x or 10x).
- **The Goal:** Mitigate losses. If the 2nd bet wins big, it's pure profit; if it crashes early, the first bet ideally cushioned the blow.

3. The Martingale (Proceed with Caution)

- **How it works:** Double your bet after every loss, aiming to recuperate all previous losses with a single win at a 2.00 x multiplier.
- **The Risk:** This requires a massive bankroll and can rapidly hit table limitations or exhaust funds throughout a cold streak. Use this technique only with strict loss limitations.
