To open a case, a player requires 2 things:

1. **A Case:** Earned passively through weekly drops, purchased on the Steam Market, or traded with other players.
2. **A Key:** Purchased directly from the in-game shop for £ 2.50 GBP (or regional equivalent).

Once opened, the video game starts a roulette-style animation, biking through various skins before stopping on a randomly picked product.

The Mathematics of Opening: Understanding the Odds

It is obvious that your house generally wins. Valve is transparent about specific mechanics-- such as the inclusion of StatTrak variations-- however the precise likelihoods of unpacking products of differing rarities have been reverse-engineered by the community and validated via controlled disclosures in specific areas.

Product Rarity Tier Approximate Drop Rate Description **Mil-Spec (Blue)** ~ 79.92% The most typical tier; typically standard military-themed styles. **Restricted (Purple)** ~ 15.98% More in-depth styles; reasonably common. **Classified (Pink)** ~ 3.20% High-tier weapon finishes; extremely searched for. **Covert (Red)** ~ 0.64% The highest basic weapon tier; very unusual and valuable. **Unique (Gold/Knife/Gloves)** ~ 0.26% The holy grail of unboxing; ultra-rare melee weapons or hand covers.

Beyond these base rarity tiers, items are further diversified by **Wear Conditions** (Factory New, Minimal Wear, Field-Tested, Well-Worn, and Battle-Scarred) and a randomized **Float Value** (varying from 0.00 to 1.00) that identifies the precise physical degradation of the skin.

The CS: GO case economy runs much like a real-world stock market. Costs are governed by supply and demand, influenced by factors such as:

- **Operation Releases:** Major updates introduce brand-new collections, momentarily shifting neighborhood focus and liquidity.
