What is the Aviator Casino Game?

At its core, Aviator is a multiplayer social game developed around an increasing multiplier curve that can "crash" at any moment. Unlike standard slots where a random number generator (RNG) identifies the result of a static spin, Aviator gives gamers a sense of agency.

The property is deceptively basic:

1. A plane takes off on the screen.
2. As the airplane climbs higher, the multiplier connected to the player's bet increases.
3. The objective is to cash out before the airplane flies away (crashes).
4. If a gamer cashes out in time, they win their stake increased by the current coefficient. If the aircraft flies away before they cash out, the bet is lost.

The game's aesthetic is intentionally minimalist, similar to early computer system graphics, which ensures it runs smoothly on both desktop computer systems and mobile devices without lagging.
