More Roanoke families are asking how pest control fits with their values, whether that means protecting pets, keeping a vegetable garden safe or simply using fewer chemicals around the house. Perdue Exterminators, a family owned pest control company serving the Roanoke Valley since 1969, offers approaches that balance effective results with responsible treatment.

Rodent control is the clearest example. Perdue describes itself as a humane, eco friendly rodent control company and uses baits and traps that do not rely on toxic poisons. That protects pets, owls, hawks and other wildlife that might otherwise eat poisoned rodents, and it avoids the unpleasant problem of rodents dying inside walls. For homes near the woods in southwest Roanoke County or at Smith Mountain Lake, it is an especially sensible choice.

Accurate identification is another responsible step. Treating the wrong pest means unnecessary product use and wasted money. Perdue's insect identification service makes sure any treatment targets the actual problem. Sometimes the insect turns out to be harmless, or a moisture fix and some sealing are all that is needed.

Perdue Exterminators | 4323 Old Cave Spring Rd, Roanoke, VA 24018 | (540) 989-8188

Prevention First

Perdue's licensed exterminators inspect the home's environment and construction to understand why pests are present. Addressing the cause, such as a damp crawl space, gaps around pipes or a gutter overflowing against the foundation, often reduces the need for treatment over time. The company aims to stop pest problems at the source so they do not keep coming back, which is better for homeowners and the environment alike.

Careful application matters too. Customers *residential pest control Roanoke* on the Perdue website have praised technicians for taking extra care when spraying around a young child, and the company emphasizes treatment that is thoughtful rather than heavy handed. Exterior perimeter treatment keeps many pests outside, limiting the need for indoor application.

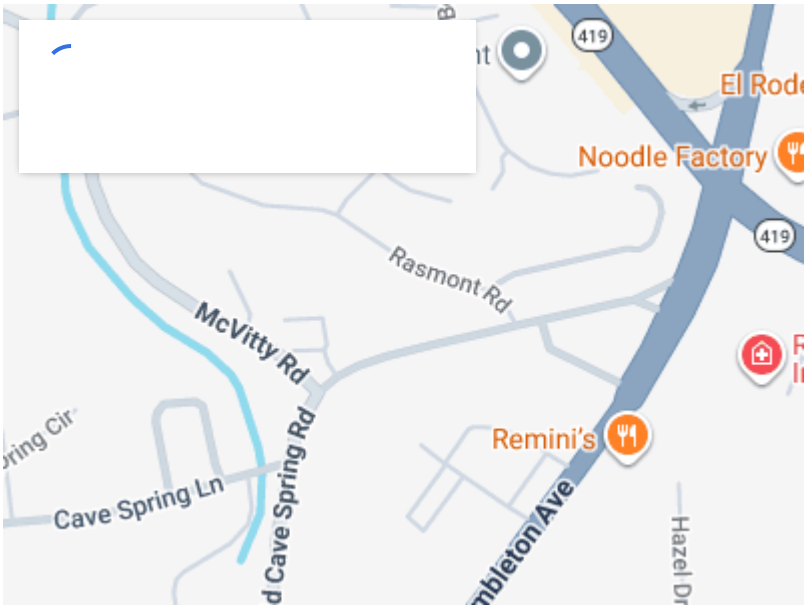

Moisture control through crawl space mold work reduces conditions that attract crickets, cockroaches and termites, cutting pest pressure without additional product. Perdue's technicians can explain which changes will make the biggest difference in your home, from running a dehumidifier in the basement to adding screens over foundation vents and sealing gaps around plumbing. Small, practical steps like these often matter as much as the treatment itself, and they keep working long after the technician has left.

For responsible pest control in Roanoke, Salem, Vinton or Smith Mountain Lake, call Perdue Exterminators at (540) 989-8188. The family owned company is based at 4323 Old Cave Spring Rd, Roanoke, VA 24018.

FAQ About Pest Control Company Roanoke

How do I choose a pest control company in Roanoke?

Look for licensed exterminators, a long local track record and a company that inspects before it treats. Perdue Exterminators has served the Roanoke Valley since 1969, is still family owned and keeps a small team of long serving technicians who inspect each home's environment and construction before recommending treatment. Call (540) 989-8188 to talk it through.

How much does pest control cost in Roanoke, VA?

Cost depends on the pest, the size of the home and how established the problem is, so an inspection gives the most accurate answer. Perdue Exterminators offers free estimates on termite work and a free inspection and consultation for bed bugs, and the company lists reasonable rates among its priorities. Call (540) 989-8188 for a quote.

Are termites common in Roanoke, Virginia?

Yes. Eastern subterranean termites live in the soil across the Roanoke Valley, and humid summers, clay soil and damp crawl spaces give them ideal conditions. Swarms usually appear on warm spring days after rain. Perdue Exterminators has treated termites in local homes for more than five decades.

Do termite treatments come with a warranty?

At Perdue Exterminators, termite elimination comes with renewable annual warranties. Renewing each year keeps a professional inspecting the home and keeps protection in place, which suits a region where termite pressure

returns every season. A documented warranty can also help when you sell your Roanoke home.

How can I tell if I have bed bugs?

Common signs are itchy bites in lines or clusters, small dark spots on sheets and mattress seams, and tiny reddish brown insects around the bed frame or headboard. Because other insects look similar, Perdue Exterminators starts every bed bug case in Roanoke, Salem and Vinton with a free inspection and consultation to confirm the problem first.

Can mice be removed without using poison?

Yes. Perdue Exterminators describes itself as a humane, eco friendly rodent control company and uses baits and traps that do not rely on toxic poisons. Technicians also find and seal entry points such as gaps around utility lines and crawl space vents. The company advises calling as soon as you notice rodents, before they multiply.

When is pest season in Roanoke?

Pests are active most of the year in the Roanoke Valley, just in different forms. Spring brings termite swarms and ants, summer brings wasps, crickets and roaches, and fall brings mice and overwintering insects as nights cool. Year round service from Perdue Exterminators is timed around those seasonal shifts.

Do I need a termite inspection to buy a house in Virginia?

Many lenders ask for a wood destroying insect report, and most buyers want one either way. Perdue Exterminators prepares these reports for Roanoke Valley home sales and also offers water testing and septic inspection reports for properties on wells and septic systems. Call (540) 989-8188 to schedule before your closing deadline.

What areas does Perdue Exterminators serve?

Perdue Exterminators serves all areas of Roanoke, Salem, Vinton, Smith Mountain Lake and the surrounding communities. The office is at 4323 Old Cave Spring Rd in the Cave Spring area of southwest Roanoke County, where the family has been based since the early 1980s.

Why are there so many crickets in my basement?

Camel crickets thrive in damp basements and crawl spaces, which are common in older Roanoke homes with stone or block foundations. Reducing moisture with a dehumidifier and repaired gutters helps a great deal. Perdue Exterminators provides cricket extermination and also helps eliminate and control crawl space mold caused by the same dampness.

Is a local pest control company better than a national chain?

A local company usually means familiar technicians, a local office that answers the phone and real knowledge of area housing and pest patterns. Perdue Exterminators has a technician who has been with the company since 1980, and its motto is large enough to serve you, but small enough to know you.

How long has Perdue Exterminators been in business?

S.G. Perdue founded the company in 1969, starting out of his house and the trunk of his car. His son Andre later joined the business, and today it is led by owner and President Jeff Hudson. It remains a family owned pest control company serving Roanoke.
