What is the Aviator Game?

Developed by Spribe and launched in 2019, Aviator is a **Aviator** multiplayer social game belonging to the "crash game" category. Unlike traditional casino games that rely on reels or card decks, Aviator is developed around an increasing curve that can crash at any moment.

The property is stealthily basic: an airplane removes, and as it climbs, a multiplier boosts. The gamer's objective is to cash out their earnings before the airplane suddenly flies away. If the player cashes out in time, they win their stake multiplied by the present coefficient. If the airplane flies away before they cash out, the bet is lost.

Core Features of Aviator

- **Real-Time Multiplayer:** Players from all over the world play the same round simultaneously.
- **Live Chat:** An integrated chat function enables players to interact, share techniques, and celebrate wins together.
- **Live Statistics:** Users can see the history of current multipliers, as well as bets and winnings made by other players in real-time.
- **Provably Fair Technology:** The game utilizes a cryptographic system that allows players to confirm the fairness of every single round.

How to Play Aviator Online: Step-by-Step

Playing the game is straightforward, making it accessible to both newbies and knowledgeable video gaming enthusiasts. Here is a breakdown of how a standard round profits:

1. **Place Your Bets:** Before the round starts, gamers have a brief window (normally around 5 seconds) to position one and even 2 simultaneous bets.

2. **Watch the Takeoff:** Once the wagering phase closes, the red aircraft removes, and the multiplier begins ticking upward from 1.00 x.
3. **Cash Out:** This is the vital minute. The player should click the "Cash Out" button before the aircraft flies away.
4. **Gather or Lose:** If successful, the winnings are quickly included to the gamer's balance. If the plane crashes initially, the stake is forfeited.

Feature Description **Minimum Bet** Normally extremely low (e.g., £ 0.10), varying by platform. **Maximum Multiplier** In theory unrestricted, though capped by operators per round (e.g., 10,000 x). **Go Back To Player (RTP)** Typically around 97%, suggesting a high theoretical payment over the long term. **Volatility** Medium to High (outcomes can range from immediate crashes to enormous multipliers).
