

Plumber Katy TX New Construction Plumbing Gal Plumbing Industries Katy's continued growth as one of the Houston area's most active real estate markets means that new construction plumbing demand remains high, both for the master-planned community developments that are expanding along the western edge of the metro area and for custom home builds in the more established sections of Katy and Cinco Ranch. Gal Plumbing Industries LLC handles new construction plumbing for residential builders and homeowners, providing the rough-in, trim-out, and final inspection services that new builds require from foundation to move-in. New construction plumbing in Texas must meet the state plumbing code and pass inspection by the applicable local authority having jurisdiction, whether that is the City of Katy, Harris County, or Fort Bend County depending on the property location. Jason Galvan's Texas Registered Master Plumber license is a prerequisite for pulling the required permits and supervising the installation work, and the company's experience with the inspection process in the local jurisdictions makes navigating these requirements straightforward. For custom home builders and homeowners working with general contractors on residential builds in the Katy area, having a licensed master plumber who can be relied upon to show up on schedule and complete phases of work when needed keeps the construction timeline moving. Gal Plumbing Industries coordinates with other trades and understands the sequencing of construction work that makes phased plumbing installations efficient.
