Nonetheless, they can snag on clothes or fashion jewelry, become aggravated, bleed, or trigger aesthetic [Discover Lipo Freeze 2U Treatments in Southampton](#) pain-- specifically on a noticeable area like the neck. For many people in Beverly Hills, Santa Monica, and Newport Coastline, that aesthetic worry alone is factor sufficient to seek professional elimination. New skin tags are common, generally safe, and often pertaining to friction, age, genetics, or metabolic variables. Most do not call for therapy unless they cause pain or cosmetic issues. Depending where they get on the body, they may obtain captured on clothing or locket and might bleed from repeated scrubbing against apparel. Should they end up being a trouble, it is necessary to know exactly how to securely eliminate skin tags.

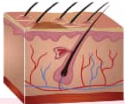

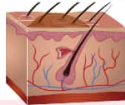

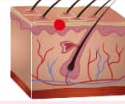

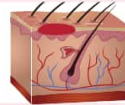

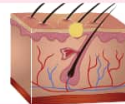

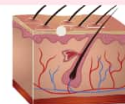

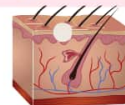

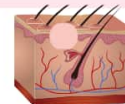

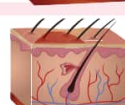

Moles take place when cells in the skin expand in a collection instead of being spread out throughout the skin. These cells are called melanocytes, and they make the pigment that provides skin its natural color. Moles might darken after exposure to the sunlight, throughout the teenager years, and while pregnant. As the years pass, moles usually alter slowly, ending up being raised and/or transforming color.
