

The hydrophobic surface created by System X ceramic coating causes water to bead and roll off a vehicle's paint rather than sitting and potentially causing water spots. This hydrophobic quality, applied by Gemstar Detailing's certified technicians, makes every future wash significantly easier for Boise vehicle owners, since dirt struggles to bond to the [vehicle ceramic coating near me](https://unsplash.com/@golivektsw) protected surface. Beyond convenience, this water repelling property also helps protect paint from mineral deposits and hard water spots common throughout the Treasure Valley's water supply.

Gemstar Auto Detailing Mobile Detail Boise | 880 E Franklin Rd Suite 306, Meridian, ID 83642 | (208) 971-4652

Boise customers can see this hydrophobic effect immediately after a proper ceramic coating application, a visible sign the coating has bonded correctly to the vehicle's clear coat. For hydrophobic ceramic coating in Boise, call Gemstar Detailing at (208) 971-4652.
