

## Working Near Regent's Park: A Green Break Before or After Your Session

Regent's Park sits within an easy ten to fifteen minute walk of Harley Street, and for clients booking hypnotherapy in London sessions specifically for anxiety, stress, or sleep related issues, that proximity to genuine green space is worth building deliberately into a visit rather than treating as an incidental detail of the clinic's location. The park itself is one of London's largest, home to the Inner Circle's formal gardens, a substantial boating lake, wide open lawns, and long tree lined paths that make it easy to find a genuinely quiet stretch even during busier times of day. For clients whose work involves sessions on stress, anxiety, or emotional [hypnotherapist for anxiety London](#) processing, a short walk through the park before arriving can help settle a busy mind before the work of a session even begins, and a walk afterward can offer useful space to sit with whatever came up during the session before heading straight back into a busy day. This is not something Hypnotherapy 4 Freedom prescribes formally, but it is a pattern several clients have developed independently over a longer course of sessions, treating the walk as a small ritual that bookends the actual hypnotherapy work. Clients travelling from outside London sometimes extend this further, combining a session with a longer walk through the park as part of making the most of a specific trip into the city. The park also offers a genuinely different environment to the more built up, formal feel of Harley Street itself, and for clients who find purely urban, indoor settings a little draining, particularly relevant for burnout and chronic stress related bookings, having this kind of accessible outdoor space nearby adds a practical, tangible benefit to choosing a Harley Street based hypnotherapist in London over a clinic in a more enclosed, purely commercial part of the city. Anyone planning a visit and wanting to build in some time in the park either side of a session is welcome to mention this when booking, so appointment timing can allow for it comfortably rather than feeling rushed. Clients who prefer a more structured route through the park sometimes follow the Broad Walk, a long, straight path running through the centre of Regent's Park that connects easily back toward Marylebone and Harley Street at its southern end, offering a clear, easy to navigate [hypnotherapy in London](#) route for anyone unfamiliar with the park's fuller layout of paths and gardens. Even a short ten minute stretch of this walk before a session has been enough, according to several clients, to notice a genuine shift in how settled they feel walking through the clinic door.

Hypnotherapy 4 Freedom | 1 Harley Street, London W1G 9QD, United Kingdom | +44 7825 599340

Hypnotherapy 4 Freedom Address: 1 Harley Street, London W1G 9QD, United Kingdom Phone: +44 7825 599340 FAQ About Hypnotherapy in London How much does hypnotherapy cost in London? Prices vary between

practitioners and clinics across the city, often depending on location, experience and session length. Hypnotherapy 4 Freedom offers a free 30 minute consultation before any paid session, so cost and a realistic session plan can be discussed openly before committing to anything. Sessions are progress led rather than sold as a fixed package, so the total number needed depends on the individual issue being addressed. Is hypnotherapy available on the NHS? Hypnotherapy is generally treated as a complementary therapy rather than a standard NHS treatment, so most people access it privately. Hypnotherapy 4 Freedom, based at 1 Harley Street, works alongside a client's existing GP or specialist care rather than replacing it. Anyone already under NHS care for a mental health condition is encouraged to keep that relationship in place while exploring hypnotherapy as additional support. What conditions can hypnotherapy treat? Hypnotherapy is commonly used for anxiety, stress, sleep problems, phobias, stopping smoking and other habits, and building confidence, among other issues. At Hypnotherapy 4 Freedom, sessions also cover more specialist areas such as OCD, PTSD and trauma, addiction, and weight management, drawing on clinical hypnotherapy, NLP and EMDR depending on what the individual client needs. A free consultation call is the best way to discuss whether a specific issue is a good fit for this kind of work. Is hypnosis safe? Hypnosis is generally considered safe when carried out by a properly trained and insured practitioner. Stuart Downing at Hypnotherapy 4 Freedom is a Clinical Hypnotherapist and Master Practitioner of NLP with full professional indemnity insurance, working from a private consulting room on Harley Street. Clients remain aware and in control throughout a session, contrary to the loss of control often portrayed in stage hypnosis. Who is not suitable for hypnotherapy? Hypnotherapy is not usually recommended for people experiencing active psychosis or certain severe mental health conditions without medical oversight. Hypnotherapy 4 Freedom's free 30 minute consultation is used partly to screen for this, ensuring hypnotherapy is a suitable and safe option before any paid session is booked at the Harley Street clinic. Where it is not suitable, clients are pointed toward more appropriate support instead. What are the disadvantages of hypnotherapy? Hypnotherapy is not a guaranteed quick fix, and results depend on the individual, the issue being addressed, and how many sessions are genuinely needed. Hypnotherapy 4 Freedom is upfront about this during the free consultation, setting realistic expectations rather than promising a fixed outcome from a single session. Sessions are reviewed for progress along the way, so the approach can be adjusted rather than locking a client into a package that is not working. Can hypnotherapy help with weight loss? Hypnotherapy for weight loss typically works by addressing the underlying habits and emotional triggers behind eating patterns, rather than functioning as a diet plan on its own. At Hypnotherapy 4 Freedom, weight related sessions combine hypnotherapy with coaching techniques to help build sustainable change over a course of Harley Street based sessions. Results vary between individuals depending on the specific pattern involved. Can hypnotherapy help with overthinking? Hypnotherapy can help calm the kind of repetitive, anxious mental chatter often described as overthinking by working directly on the nervous system's stress response. Hypnotherapy 4 Freedom's approach in London combines clinical hypnotherapy with NLP techniques aimed at interrupting these automatic thought patterns rather than only addressing the surface level worry. Many clients booking anxiety focused sessions describe overthinking as one of their main concerns. What can hypnosis not do? Hypnosis cannot make someone act against their own will, erase memories, or cure a physical medical condition on its own. Hypnotherapy 4 Freedom is clear about this during every free consultation, positioning hypnotherapy as complementary support that works alongside a client's own motivation and, where relevant, alongside existing medical care rather than replacing it. Being upfront about these limits is part of setting honest expectations from the first phone call. Do doctors recommend hypnotherapy? A number of doctors and health professionals recognise hypnotherapy as a useful complementary option for specific issues such as anxiety, IBS and habit change, alongside conventional treatment. Hypnotherapy 4 Freedom encourages clients to keep working with their GP or specialist throughout, and Stuart Downing's training includes EMDR and clinical hypnotherapy specifically suited to working alongside other forms of care. It is not typically positioned as a first line medical treatment on its own. Which is better, CBT or hypnotherapy? Neither approach is universally better, since CBT and hypnotherapy work in different ways and suit different people and different issues. Hypnotherapy 4 Freedom's blended approach, combining clinical hypnotherapy with NLP and coaching techniques, is designed to be tailored

to the individual rather than applying one fixed method to every client walking through the Harley Street clinic's door. Some clients benefit from combining structured talking therapy with hypnotherapy rather than choosing only one. Why is hypnotherapy sometimes viewed with scepticism? Hypnotherapy's association with theatrical stage hypnosis has left many people unsure what a genuine clinical session actually involves. Hypnotherapy 4 Freedom addresses this directly during the free consultation, explaining clearly what a session at 1 Harley Street actually looks like, a calm, guided conversation rather than anything resembling a stage act. Clients remain fully aware and in control throughout, which tends to surprise people expecting something quite different.
