What is the Aviator Casino Game?

At its core, Aviator is a multiplayer social game built around an increasing multiplier curve that can "crash" anytime. Unlike standard slots where a random number generator (RNG) determines the result of a fixed spin, Aviator provides gamers a sense of company.

The facility is stealthily simple:

1. An aircraft removes on the screen.
2. As the plane climbs up greater, the multiplier attached to the gamer's bet increases.
3. The objective is to cash out before the aircraft flies away (crashes).
4. If a gamer cashes out in time, they win their stake multiplied by the current coefficient. If the plane flies away before they cash out, the bet is lost.

The game's aesthetic is purposefully minimalist, similar to early computer graphics, which ensures it runs smoothly on both desktop and mobile gadgets without lagging.
