A human dealership manages the game from a specially created studio. They shuffle the cards (or deal them from a physical shoe), engage with players via a live chat box, and spin the wheel or deal the cards in real-time. Advanced optical character acknowledgment (OCR) technology equates the physical cards and actions into digital data, permitting the software to instantly acknowledge wins, losses, and presses.

- **Immersive Atmosphere:** High-definition multi-camera angles, expert lighting, and authentic casino sounds develop an immersive environment.
- **Accessibility:** There are no dress codes, no travel costs, and no awaiting a seat to open up at a crowded Friday bedside table (thanks to functions like "Bet Behind").
