How the Game Works: Core Mechanics

To truly master the skies, a gamer must initially comprehend the foundational mechanics of the game. While precise functions can vary slightly depending upon the particular platform hosting the game, the universal framework stays constant.

The Flight Phase

When a round starts, the aircraft lifts off the runway and begins its climb. As it climbs, a multiplier counter begins ticking upward-- beginning at 1.00 x and continuing to increase. The longer the flight continues without occurrence, the higher the multiplier goes.

The Descent and Hazards

The skies are rarely clear. Along the flight path, numerous components appear that can either boost the gamer's rating or prematurely end the run. These can consist of favorable tailwinds, fuel increases, storm clouds, or

unexpected altitude drops.

Cashing Out

The specifying mechanic of Avia Masters is the aspect of risk versus benefit. Gamers must choose the optimal moment to "cash out" or protect their development. Wait too long, and a sudden risk may crash the aircraft, leading to a lost round. Money out prematurely, and gamers might miss out on huge multipliers.

Game Phase Description Player Action **Pre-Flight** Setting stakes or preparing the airplane for launch. Location preliminary criteria or start the round. **Ascent** The airplane removes; multipliers begin to climb. Monitor the flight path and view the multiplier grow. **Mid-Flight** Browsing threats, gathering perks, and examining danger. Choose whether to hold on or secure the present rating. **Resolution** The flight ends either by means of an effective cash-out or a crash. Collect benefits and prepare for the next round.
