How CS: GO Case Opening Works

When a player purchases a weapon case and a matching secret from the in-game store, they unlock a random selection of items. Each case contains a pre-programmed swimming pool of skins, and the video game's random-number generator (RNG) figures out which skin the gamer receives. The procedure can be broken down into three simple actions:

1. **Acquire a case**-- Cases can be earned through gameplay drops or bought from the Steam Community Market.
2. **Purchase a key**-- Keys are sold at a fixed price, generally £ 2.50 GBP.
3. **Open the case**-- Clicking "Open" triggers the RNG, and a single skin is revealed based upon weighted likelihoods.

The whole experience is developed to be quick, aesthetically appealing, and tied to real-world value through the Steam Marketplace.

Mil-Spec	Blue	~ 3.9%	
Restricted	Purple	~ 0.65%	
Classified	Pink	~ 0.25%	
Covert (Rare)	Red	~ 0.13%
