

If you're tackling a remodel or roofing project in Hampton Roads, one of the key questions you'll have is: **can I put drywall and lumber in these dumpsters?** Whether you're a homeowner cleaning out your garage or a small contractor managing a construction site cleanup, knowing what goes in your dumpster and what doesn't is crucial for smooth disposal and avoiding surprise fees.

At D.E.M.M. DUMPSTERS LLC, we specialize in providing straightforward dumpster rental solutions designed for projects just like yours — remodel, roofing, and every construction phase in between. With our upfront pricing, no hidden fees, and flexible sizing options, managing waste becomes hassle-free.

What Can I Put in a D.E.M.M. Dumpster? Wood and Drywall Accepted

When it comes to wood and drywall, the good news is that D.E.M.M. DUMPSTERS LLC **accepts both lumber scraps disposal and drywall waste**. These materials often make up a large portion of debris from remodels and roofing jobs, so having a dumpster service that addresses these common construction materials helps keep your site clear and operations efficient.

Wood and Lumber Disposal

Lumber scraps, dimensional lumber, pallets, and even pressure-treated wood can be disposed of in the right [demmdumpsters](#) dumpster. However, there are exclusions such as lead-painted lumber or contaminated wood, so if you have questions, it's always best to clarify beforehand.

Drywall and Sheetrock Disposal

Drywall waste from taping, mudding, or demo can be bulky, but it's accepted in D.E.M.M. dumpsters. Just avoid wet drywall or materials mixed with hazardous waste.

Dumpster Sizes: Choosing the Right Fit for Your Project

Not every project needs the same size dumpster. At D.E.M.M. DUMPSTERS LLC, you can choose from several common sizes tailored for different cleanup needs:

- **10-yard dumpsters** - Ideal for smaller remodel projects or minor roofing debris.
- **15-yard dumpsters** - A good fit for medium-sized construction site cleanups or significant debris removal phases.
- **20-yard dumpsters** - Best for larger remodels or roofing jobs, or when you anticipate lots of lumber and drywall waste.

Unsure which size to book? Use the online booking tools on demmdumpsters.com or get advice via phone to match your debris volume efficiently. This prevents overpaying for unused space or needing multiple dumpsters.

Pricing and Upfront Costs: What to Expect

D.E.M.M. DUMPSTERS LLC is all about transparency. When you rent a dumpster, you'll see upfront pricing with **no hidden fees**. To give you an example, here are some common rates for a 10-yard dumpster:

Duration Price 3 days \$349 7 days \$399 14 days \$469

These prices include a certain tonnage allowance. If you go over the included tonnage, overage fees apply per pound, but this is all explained clearly before you book. That way, you can budget accurately and avoid surprises.

Booking Your Dumpster: Online or By Phone

For scheduling convenience, you have two great options for booking your dumpster with D.E.M.M. DUMPSTERS LLC:

1. **Online booking:** Simply visit demmdumpsters.com where you can select your dumpster size, rental duration, and see pricing instantly.
2. **Phone calls:** Prefer speaking with someone? Call their customer service to discuss your project specifics, dumpster sizing questions, or special delivery requests.

Both methods emphasize customer convenience and ensuring you get exactly what your project needs.

Delivery Times and Project Timing

Nobody wants to wait around on a dumpster delivery when debris piles up on site. Thanks to D.E.M.M. DUMPSTERS LLC's local operations in Hampton Roads, they often offer **same-day or next-day delivery when**

available. Planning ahead helps, but if you find yourself needing a dumpster quickly for drywall and lumber disposal, they do their best to accommodate urgent deliveries.

Construction Site Cleanups Made Easy

Construction projects, especially remodels and roofing jobs, generate lots of waste daily. Coordinating swap-outs and keeping crews moving requires dependable dumpster service that accepts your debris types, provides clear pricing, and is flexible on timing.

D.E.M.M. DUMPSTERS LLC excels in this space by:

- Accepting common construction waste including wood and drywall
- Offering multiple dumpster sizes so you don't pay for unused space
- Providing upfront pricing with no hidden fees for better budgeting
- Offering quick delivery to keep your project moving
- Convenient online or phone booking options

Tips for Properly Disposing of Drywall and Lumber in Dumpsters

To make sure your disposal follows guidelines and stays within your rental terms, keep these best practices in mind:

1. **Separate debris:** If your job produces hazardous or painted wood, remove those materials before loading the dumpster.
2. **Keep drywall dry:** Wet drywall can create heavy, messy debris that might violate disposal regulations.
3. **Don't overload:** Fill the dumpster safely but don't exceed the required weight or volume limits. This often helps avoid overage fees.
4. **Distribute debris evenly:** Placing lumber and drywall waste evenly inside the dumpster ensures safe transport.

Summary: Got Wood and Drywall? D.E.M.M. DUMPSTERS LLC Has You Covered

In summary, if you are wondering whether you can put drywall and lumber in dumpsters for your remodel or roofing projects, D.E.M.M. DUMPSTERS LLC provides a reliable, transparent solution tailored for construction site cleanups in Hampton Roads. With acceptance of lumber scraps and drywall, multiple dumpster size options, upfront pricing like \$349 for a 3-day 10-yard rental, and fast delivery options, their service makes waste removal easy and clear.
