- **The Dual-Bet Strategy:**
    - *How it works:* Players put 2 bets all at once. The first bet is set to auto-cash out at a moderate multiplier (e.g., 2.00 x) to secure an earnings or break even. The 2nd bet is left to run manually for a higher, riskier multiplier (e.g., 10x or greater).
    - *Objective:* Balancing safety with the adventure of chasing after an enormous payout.
- **The Martingale System (Use with Caution):**
    - *How it works:* Doubling the bet after every loss, with the objective of recuperating all previous losses plus a revenue when a win lastly happens.
    - *Objective:* Mathematically recuperating losses, though this requires a really large bankroll and can rapidly hit table limitations.
